Tomango

WEB DEVELOPER - TOMANGO

Lewes

Tomango creates beautiful brands and industry-leading websites for ambitious businesses across the UK. Based in a converted farm building in a rural location about five minutes from Lewes and 20 minutes from Brighton, we're a perfectly blended team of dedicated and passionate designers, developers and marketers who get a huge kick from seeing our clients succeed.

This is an exciting opportunity to join a growing company and help lead our development team.

Job Description:

This role has great potential and is ideal for an experienced but ambitious web developer looking to play a pivotal role in the development of the business. You'll be working closely with key clients and other lead personnel in the company and will be expected to take a leading role in Tomango's digital output.

Working alongside the Creative Director and Managing Director, you will be responsible for building and managing websites, delivering projects on time, on budget and to a high standard. You will also provide technical resource for trouble-shooting and front-line customer support.

You'll be a dedicated and committed developer that strives for excellence and continual improvement, but you'll already have high standards of quality and delivery, outstanding communication skills and be comfortable working under pressure.

Key tasks and responsibilities:

- Liaising with key clients, you'll be responsible for planning and developing industry-leading websites
- Working closely with the Creative Director, you'll be converting Sketch designs into semantic and performant sites
- You will be responsible for ongoing improvements to and management of existing websites
- You'll provide technical resource for trouble-shooting and front-line customer support, and be expected to deliver exceptional levels of custom[illegible]ce

- You'll provide technical resource for trouble-shooting and front-line customer support, and be expected to deliver exceptional levels of customer service
- You'll help make sure projects are completed on time and on budget

11

Tomango

Skills Range:

Attributes and skills

- At least three years experience in web development
- Strong HTML, CSS, JavaScript and PHP knowledge
- Good understanding of web performance and responsive design
- Ability to convert designs (Sketch) into semantic and performant websites
- Working knowledge of bespoke WordPress theme development
- Keen eye for detail and ability to write solid, robust code
- Gulp and SCSS skills
- Great communication skills

It would also be useful for you to have

- Understanding of Git
- Experience managing web servers and hosting infrastructure
- Experience with web hosting

How we're different

We've loved creating brands, designing websites and delivering digital marketing campaigns for our clients since 2013.

But a little while ago we realised what really matters to us is when we make a big difference to our clients' businesses.

This is the reason we get up in the morning.

So, if you just want a logo made, or a website built, or someone to make your designs look pretty, we're not the right fit for you.

But if you need help to grow your business and want to put yourself in the hands of experts, we should talk.

JUNIOR GAMES DEVELOPER - PLUG-IN MEDIA

Brighton and Hove

Plug-in Media is a BAFTA-winning digital media production company that delivers engaging, interactive entertainment for children and families. We blend animation, gaming and narrative with great design and first-class technical development to produce work that is visually stunning, technically groundbreaking and with great storytelling and humor at its core.

Job Description:

Plug-in Media is looking to recruit a Junior Games Developer to work in their busy studio in the heart of central Brighton, not far from the station and the North Laine area. We typically have a range of diverse and exciting projects across several technologies and platforms, and are looking for someone who will take an active (and highly important) role in bringing these to life alongside our small team of very skilled Developers!

Our busy studio has a positive and cheerful atmosphere, where everyone's voice is heard. It's true to say that while everyone here works hard, we all have a lot of fun doing it! We have regular company get togethers, barbeques, outings and show-and-tells. Other employee benefits include: up to 25 days holiday a year, an employer-contributed company pension scheme, sandwich Thursdays and free fruit!

As a Junior Developer, you'll have great enthusiasm for the web/mobile technology industry, and experience developing with a range of technologies. You'll be on your way to an excellent standard of competence using HTML5/JavaScript, and you'll be comfortable working with Unity. You'll also have (possibly) tinkered with some platform native tools using the core Android and iOS SDKs. You'll know that today's Developer is something of a 'jack of all trades' where specific tools are concerned; you might not be an expert in Obj-C for example, but you'll be well up for (and highly capable of) the challenge of gaining professional competence with it it, if it turns out to be the right tool for the job! We make games - the specific technology used is variable, depending on the job!

We welcome applications from Developers coming from a keen hobbyist or university-leaver type of situation, looking for a junior role.

Skills Range:

Key responsibilities:

You will play a pivotal role within our development team, working to deliver games and apps on the web and on mobile devices.

17

Skills Range:

Key responsibilities:

You will play a pivotal role within our development team, working to deliver games and apps on the web and on mobile devices.

Essential experience & skills:

- Good progress towards mastering HTML5/JavaScript, and good familiarity with Unity.
- Familiarity with the state of all things 'mobile'
- A good grasp of basic mathematics for games (vectors, basic trigonometry)
- A team player with good communication skills and a sense of humour
- An insatiable hunger for developing existing talents in game development

Desirable experience & skills:

- Experience with Javascript/HTML5 for game development (possibly using an engine such as Phaser or EaselJS).
- Experience in writing and debugging scripts in C# using Unity.
- A good understanding of 3D game development
- Practised knowledge of version control systems, particularly SVN

About the Role | Who are we looking for?
Due to our increasing success and growth, we are growing our team of enthusiastic experts. We are recruiting for an experienced Senior Game Engine Developer to join our team. Reporting to our Head of Software, working on the integration of real time render engines into our media server products.

- C++ development
- Knowledge of 3D modelling programs and workflows
- Familiarity with real time rendering engines (Unreal, Unity, etc)
- Comfortable working with a tightly knit (but fun!) development team

Mandatory Technical Skills and Experience | The 'Must-Have's

Candidates must have more than 5 years' experience of working in all the following areas:
- Bachelor's degree in Computer Science (or related field)
- 5+ years of relevant work experience
- Clean and maintainable code practises
- Expertise in video game engine workflows and object-oriented design.
- Experience with Agile or Scrum software development methodologies
- Ability to multi-task, organize, and work often alone
- Valid passport
- Driving licence

Additional Useful Skills | The 'Helpful to Haves'
- HLSL and GLSL shader languages
- Video system workflows
- Knowledge of computer hardware (CPU, GPU, etc)
- Knowledge of Film and broadcast techniques

Why work for us?
- Competitive salary
- Private healthcare – UK (US candidates - Health/dental/optical insurance and 401k offered)
- 23 days annual holiday (plus 8 English public holidays) rising by 1 day per full

BRIGHTON DIGITALFESTIVAL

We're transitioning into a new home for 2021

Brighton Digital Festival (BDF) is transitioning to become a seasonal programme hosted by Lighthouse rather than existing as an independent company. 2021 will see the start of a major collaboration with two other digital festivals to co-commission a range of exciting outdoor digital artworks. A steering group is being recruited to ensure BDF remains a community-driven platform that supports and encourages people across the city to experience and explore digital culture.

Brighton & Hove is home to a thriving digital and creative sector; it is a city overflowing with talent and ideas – full of potential. Brighton Digital Festival will continue to harness this creativity and support ground-breaking and innovative collaborations which are part of the very fabric of our city.

Over the last few years, it has been a struggle to fund a year-round, independent organisation that engages with all the different people,

Data Protection

36

Core Tenets of GDPR

ico. Information Commissioner's Office

At a glance

- The GDPR sets out seven key principles:
  - Lawfulness, fairness and transparency
  - Purpose limitation
  - Data minimisation
  - Accuracy
  - Storage limitation
  - Integrity and confidentiality (security)
  - Accountability
- These principles should lie at the heart of your approach to processing personal data.

CI465 37

37

Much more expensive

General Data Protection Regulation
Adopted by European Union in April 2016
Came into force in May 2018

Fines of up to 4% of global annual turnover or 20 million Euros (whichever is greater)

Eg. Google's 2015 turnover= $75 billion
4% = $3 billion

CI465 38

38

European Commission

Factsheet on the "Right to be Forgotten" ruling *(C-131/12)*

1) What is the case about and what did the Court rule?

In 2010 a Spanish citizen lodged a complaint against a Spanish newspaper with the national Data Protection Agency and against Google Spain and Google Inc. The citizen complained that an auction notice of his repossessed home on Google's search results infringed his privacy rights because the proceedings concerning him had been fully resolved for a number of years and hence the reference to these was entirely irrelevant. He requested, first, that the newspaper be required either to remove or alter the pages in question so that the personal data relating to him no longer appeared; and second, that Google Spain or Google Inc. be required to remove the personal data relating to him, so that it no longer appeared in the search results.

The Spanish court referred the case to the Court of Justice of the European Union asking:

(a) whether the EU's **1995 Data Protection Directive** applied to search engines such as Google;

(b) whether EU law (the Directive) applied to Google Spain, given that the company's data processing server was in the United States;

(c) whether an individual has the right to request that his or her personal data be removed from ac-
[illegible]ity via a search engine (the "right to be forgotten");

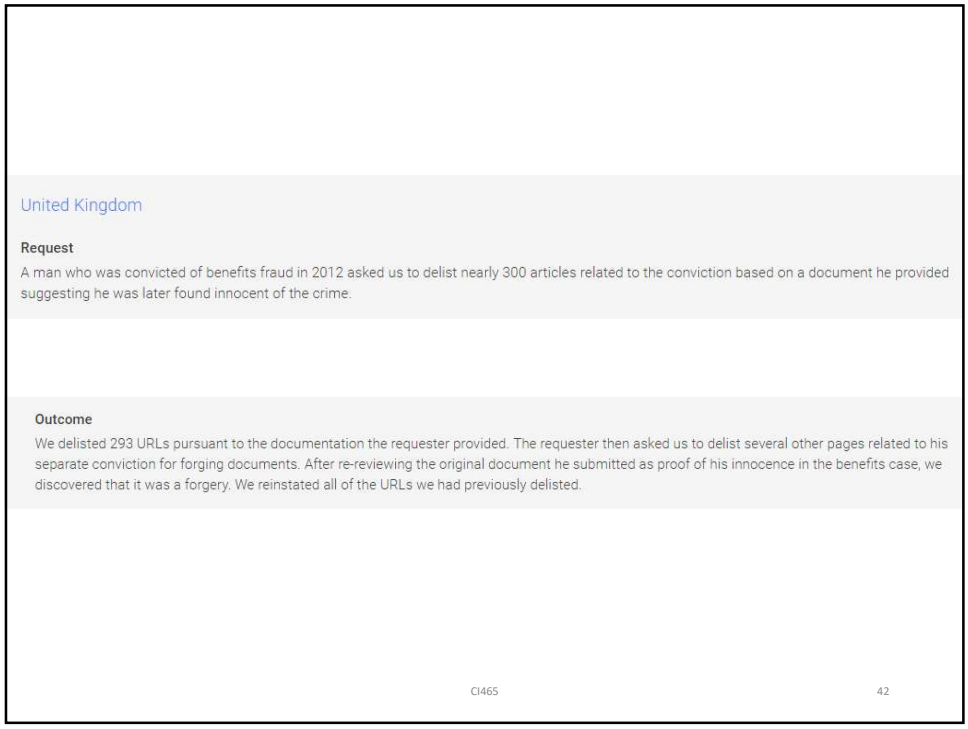
United Kingdom
Request
A former bank clerk who was imprisoned for stealing money from elderly people's bank accounts asked us to delist news articles from 2008 covering the conviction. His conviction became spent under UK law in 2013.
Outcome
We delisted 4 articles after the Data Protection Authority requested that we remove.
CI465
41

41



United Kingdom
Request
A man who was convicted of benefits fraud in 2012 asked us to delist nearly 300 articles related to the conviction based on a document he provided suggesting he was later found innocent of the crime.
Outcome
We delisted 293 URLs pursuant to the documentation the requester provided. The requester then asked us to delist several other pages related to his separate conviction for forging documents. After re-reviewing the original document he submitted as proof of his innocence in the benefits case, we discovered that it was a forgery. We reinstated all of the URLs we had previously delisted.
